SUMMARY AND TABLE OF CONTENTS OF USSR BOOK
 ON CALCULATION AND DESIGN OF ELECTRON TUBES

The book Calculation and Design of Electron Tubes, by B. M. Tsarev, published by Gosenergoizdat in 1952, presents basic information on the theory of electrical, thermal, and mechanical calculations both of parts of modern electron tubes and of the tubes themselves according to assigned parameters. Parts constructions and tube design principles are also given. Handbook data necessary for these calculations are given in appendices. The book represents the first attempt to create a manual of this type. The need for such a book was felt by the author in drawing up and teaching the course "Calculation and Design of Electron Tubes" to students of the Moscow Power Engineering Institute imeni Molotov in 1940 - 1941 and 1948 - 1951.

TABLE OF CONTENTS

	<u>Page</u>
Foreword	3
List of Abbreviations Used in the Text	9
Introduction	11
0-1. Modern Applications of Electron Tubes and Requirements Imposed on Them	11
0-2. Classification, Basic Constructions, and External Appearance of Modern Electron Tubes	12
0-3. Elements of the Construction of Electron Tubes and Their Parts: Surfaces as Structural Elements of Tubes and Their Properties	16

Part I

Theoretical Principles in the Calculation of Electron Tubes

Chapter 1 - Laws of Current Flow in Two-Electrode Systems

	<u>Page</u>
1-1 Current Flow in a Plane Two-Electrode System for Low Initial Electron Velocity	18
1-2 Current Flow in Cylindrical and Spherical Two-Electrode Systems	29
1-3 The Effect of Voltage Drop Along the Cathode and the Current Equation for Directly Heated Cathodes	40
1-4 Current Flow for High Initial Velocities	48
1-5 Electron Transit Time	51
Chapter 2. Theory of the Triode	54
2-1 Current Equation for Plane and Cylindrical Triodes	54
2-2 Formulas for Calculating Amplification Factor	58
2-3 Formulas for Transconductance and Internal Resistance	74
Chapter 3. Theory of Current Division	80
3-1 Laws of Current Division	80
3-2 Effect of Secondary Emission on Current Division	85
3-3 Electron Optics Method of Reducing Screen-Grid Currents	88
Chapter 4. Laws of Current Flow for Multigrid Tubes	93
4-1 Space-Charge-Limited Current Equation for Pentodes and Tetrodes	93
4-2 Current Division in Pentodes	96
4-3 Pentode and Beam Tetrode Amplification Factors	97
4-4 Transconductance and Internal Resistance of Pentodes	99
Chapter 5. Effect of Contact Potential Difference and Initial Grid Currents	101
5-1 The Nature of Contact Potential Difference	101
5-2 The Effect of Contact Potential Difference on Tube Parameters	106
5-3 The Nature of Initial Currents in Control-Electrode Circuits	107

Part II

	<u>Page</u>
Calculation and Design of Parts of Electron Tubes	121
Chapter 6. Cathodes of Electron Tubes	121
6-1 Classification of Heated Cathodes and Their Area of Application in Electron Tubes	121
6-2 Design and Calculation of Cathodes of Pure Metals	126
6-3 Design of Thin-Layer Cathodes	140
6-4 Design and Calculation of Indirectly Heated Oxide Cathodes	146
6-5 Design of Directly Heated Oxide Cathodes	151
6-6 Design and Calculation of Heaters for Indirectly Heated Oxide Cathodes	154
6-7 Design of Springs for Attaching Directly Heated Cathodes	163
Chapter 7. Plates of Electron Tubes	169
7-1 Classification of Plates and Materials Used for Their Manufacture	169
7-2 Design and Calculation of Plates With Radial Cooling	179
7-3 Design and Calculation of Liquid-Cooled Plates	187
7-4 Design and Calculation of Air-Cooled Plates	196
Chapter 8. Envelopes of Electron Tubes and Seals in Them	207
8-1 Classification of the External Appearance of Receiving-Amplifying and Transmitting Tubes	207
8-2 Materials Used for the Envelopes of Electron Tubes	212
8-3 Materials Used for Seals; Construction of Seals; Pins of Receiving-Amplifying and Transmitting Tubes	216
8-4 Design of Bases and Their Attachment; Standard Base Types	223
Chapter 9. Grids of Electron Tubes	228
9-1 Classification of Tube Grids and Requirements Imposed on Them	228
9-2 Materials Used for the Manufacture of Grids	229
9-3 Design of Tube Grids and Methods of Reducing Their Temperature	231

Chapter 10. Auxiliary Tube Parts	233
10-4. Getters	233
10-5. Intratube Insulators	239
10-6. Mounting Parts; Shields, Attaching the Tube in the Envelope	243
Part 3	
Design of Electron Tubes	
Chapter 11. Two Electrode Tubes	249
11-1 Basic Applications and Classification of Two-Electrode Tubes	249
11-2 Calculation and Design of Rectifier Tubes for Radio Receiving Equipment	249
11-3 Design of High-Voltage Rectifiers	261
11-4 Diodes for Detection	263
Chapter 12. Three-Electrode Tubes	268
12-1 Basic Applications of Three-Electrode Tubes	268
12-2 Triodes for Audio-Frequency Amplification	269
12-3 Transmitting Triodes for the Long- and Short-Wave Bands and Modulator Triodes	277
12-4 Transmitting Triodes for the Ultrashort-Wave Band; Triodes for Grounded-Grid Circuits	284
Chapter 13. Tubes With a Screen Grid (Tetrodes and Pentodes)	294
13-1 Types of Tubes With a Screen Grid and Their Use	294
13-2 Elements of the Calculation of Pentodes and Beam Tetrodes	296
13-3 Receiving-Amplifying Tetrodes and Pentodes	306
13-4 Transmitting Tetrodes and Pentodes	313
Chapter 14. Examples of Calculations of Electron Tubes	318
14-1 Calculation of a Rectifier for the Supply Circuits of Radio Receiving Equipment	318
14-2 Calculation of a Transmitting Tube With a Thoriated Carbide Cathode	323
14-3 Calculation of a Transmitting Triode With an Artificially Cooled Plate	328
